🌐 [Portfolio](#)

Summary

Full-stack and mobile developer focused on AI-powered applications, cross-platform systems, and intelligent user experiences. Built and shipped 5+ production-grade applications using React, Next.js, React Native, and Node.js, alongside published research in EEG-driven cognitive systems and multimodal robotics.

Education

University of Mumbai

Bachelor of Science in Computer Science

Jun. 2023 – May 2026

Mumbai, Maharashtra

Experience

Freelance Frontend & Full Stack Developer

2026 – Present

- Engineered responsive SaaS dashboards, AI-integrated tools, and business websites for 3+ clients using React, Next.js, and Node.js, reducing average client delivery time by **30%**.
- Architected and shipped cross-platform mobile apps using React Native and Expo, targeting both iOS and Android from a single codebase.

Projects

Lumen Archive - Multi-Format Blogging Platform | *Next.js, Supabase, Mistral AI, Tiptap*

Live | GitHub

- AI-powered multi-format publishing platform supporting **5+ content formats** with real-time version history and trending topic maps.
- Mistral AI writing assistant reducing drafting time ; Anonymous posting with privacy-safe Supabase auth flows.

Groovli - Premium Music Streaming Platform | *React Native, Expo, Node.js, PostgreSQL, Redis*

Live | GitHub

- Full-stack streaming platform with custom Node.js APIs serving concurrent audio workflows at **sub-0.4s latency** via PostgreSQL and Redis caching.
- Synced lyrics rendering, background playback, and JWT-based authentication for a seamless cross-platform listening experience.

Beatus - AI-Driven Wellness & Binaural Audio Platform | *React Native, Flask, Supabase, Google Fit API*

GitHub

- Wellness app generating **real-time personalized binaural beats** from physiological signals with Google Fit API smartwatch integration.
- Cognitive API** achieving mood-state classification from EEG-inspired sensor data; forms the basis of a published research paper.

AI-Based Talking Robot - Multimodal Interactive Assistant | *Raspberry Pi, OpenCV*

- Multimodal robotic system with **Indian Sign Language recognition** at **90%+ accuracy**, improving accessibility for non-verbal users.
- Unified hardware, adaptive binaural audio, and wave-based display animations into an assistive communication platform; **published research paper**.

Brief - AI-Powered News Intelligence Platform | *React Native, Expo, TypeScript*

Live | GitHub

- Quad-AI fallback engine** chaining Groq, Gemini, and Mistral for **99%+ uptime** on news summarization and real-time bias analysis across **10+ sources**.
- Bilingual (English/Hindi) support, **Chat with News** contextual Q&A, and offline-first local persistence with zero external data exposure.

Research Publications

EEG-Driven Cognitive State Classification for Personalized Binaural Beat Recommendation

International Journal of Advance & Innovative Research (IJAIR), 2026

DOI: 10.5281/zenodo.20344031

- Cognitive API classifying **5+ mental states** from EEG-inspired signals; mapped to personalized binaural frequencies with real-world validation via **Beatus**.

Indian Sign Language Recognition and Cognitive Optimization Through a Multimodal Robotic System

International Journal of Advance & Innovative Research (IJAIR), 2026

DOI: 10.5281/zenodo.20352182

- Computer-vision framework for real-time ISL gesture recognition combined with adaptive audio feedback; **fully integrated hardware-software pipeline**, peer-reviewed.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL

Frontend: React.js, Next.js, React Native, Tailwind CSS

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs

Databases: PostgreSQL, Supabase, MongoDB, MySQL, Redis

AI / ML: Machine Learning, Deep Learning, YOLOv5, OpenCV

Tools / Platforms: Git, GitHub, Postman, Linux, Raspberry Pi, Vercel, Render, Figma
